A Ruse That Attracted as Well as Di-

It appeared to be some sort of animal with a headlight fastened to its forehead. As it came nearer it resolved likelf into the shape of a beman being—perhaps some shelk with a red fez. But in another moment Mrs. Wil-mington recognized Martha Maria So-phrina Smith, the seventeen-year-old colored girl who came every Monday

for the laundry.

Martha Maria had a flaming red ribbon four inches wide round her bend. It was tied in front into a huge bow. the wings of which stood out four inches beyond her forebead.

Mrs Wilmington was surprised, for, although she had noticed some of the signs of pride of dress in Martha Maria, the girl and more than the ordi-

#### GOLD LETTERED SIGNS.

None of the Leaf Used In Making Then

Is Ever Wasted. "On the matter of domestic economy in the American household, which, it is asserted, the housewives and the boys and girls of the family no longer practice, it is interesting to know that if economy be a lost art at home it is pursued with a great deal of care in many lines of business," remarked Henry A. Shields of New York, "I was impressed a few months ago by the observation of a sign painter, who informed me that he could not deliver a sign I had ordered on a certain day because in the intervening time he would have the quarterly clean up day. I was curious to know what clean up

day meant, and he told me. "It appears that in the making of signs a great deal of gold leaf is used, and necessarily some of it is wasted. just as it is when gold letters are placed on show windows. I had never noticed that when the painter is at work putting the leaf on he is careful to conserve all the leavings. Just so in the shops. All refuse there is carefully brushed into a pile and kept. In three months' time there will be a great deal of what appears to be rubbish around a sign painter's shop, but the painter knows its value. This rubbish is cleared up, stowed in bags and sent to Philadelphia, where it is screened and the particles of gold leaf extracted. My friend informed me that it is not unusual to get as high as \$90 out of one shipment of rubbish, all of which goes to the workmen in the shop and not to the owner."-Washing-

When Charlemagne Took a Bath. Like so many of the European warm springs and bathing places, Baden-Raden was first appreciated by the especial honored it by his patronage and adorned it in various Roman ways. With the fall of the empire and the arrival together of the barbarians and Christianity bathing and, above all, bathing in warm water, fell into disuse all over Europe as an enfeebling and immoral practice. It was only when Charlemagne, whose name was one to conjure with, dipped his imperial person in the hot springs of Aix-ia-Cha-pelle that bathing, after seven centuries of disuse, became again permis sible, if not almost desirable. From that time on, with varying fortunes, Baden-Raden was a health and pleasure resort.- Harrison Rhodes in Harper's Magazine.
